

KARAM SAWAN

Fortend Developer Engineer

Experience

10-2024
present

E Technologies , Istanbul

Senior FrontEnd Developer

- **Islam Channel Giving V2** : This project was developed within the MGS Software company, and after it was delivered, the project management team decided to establish an independent company to continue development and further strengthen the project. As a result, features such as the ability to make regular donations, conduct direct chats, and organize official donation campaigns in collaboration with authorized organizations in the United Kingdom were added.
